

Update subscription agreement

Extent

The subscription is valid for one or many licenses of the software cadett ELSA and/or AutoCAD Electrical. The agreement is valid only if the licenses for which the subscription applies are updated to the newest available version when the agreement is signed.

All new versions of the software will be delivered at no additional cost during the time that the subscription is valid. A “new version” is an update that would have been associated with a fee if a valid update subscription would not be present.

Duration

The subscription is valid for 12 months from when it is signed and will be automatically prolonged with 12 months if none of the parties terminate it not later than 3 months before the end of the period.

Additional services

A support agreement will give access to unlimited support by telephone, fax or e-mail. Free access to the support area of the homepage of cadett is also in-

cluded. The support agreement is separate from the update subscription. Please ask for more information!

Annual fee

Prices below are specified in Euro (€) with VAT not included.

<input type="checkbox"/> cadett ELSA View	€65.-
